DVDs

A DVD on the control of salmonella in turkey production and another on the control of salmonella in laying hens are available from VLA. The first shows details of the new regulations and sampling requirements that will be introduced for turkey flocks and hatcheries in 2010 and illustrates best practice in the control of salmonella in turkey breeding and production. The second is an informative and practical presentation for farmers and their veterinary surgeons, providing a guide to the most important aspects of salmonella control on the farm.

A [leaflet](#) is also available that summarises the main testing requirements and salmonella control measures.
